Art Unit: 3714

DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: "Language Selection Option During a Game Session."

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ambler et al. (US 2002/0133523 A1) in view of Kruse et al. (US 5,618238).

2. Ambler discloses a multilingual user interface system that allows a computer user to switch between the available languages without interrupting the application program (Ambler: Abstract). In other words, the text of the interface or screen image will change without having to restart the program from the beginning and losing any of the user's data (Ambler: par. 13, lines 1-3). Therefore, a user is allowed to resume the program from the same exact point in the program's flow without the loss of their work. The system displays at the top of the screen a language selection picture (Ambler: Fig. 2), which comprises of any number of language-specific icons (Ambler: par. 36, line 14) to allow a user quickly and dynamically update the interface. Once a user clicks on an icon the system updates the text with the new language text (Ambler: par. 35, lines 13-15) by matching the data records of one language with another. The data records are accessed from a text file called Ircf.ini (Ambler: par. 48, lines 5-6) or the Language Resource Control File

Application/Control Number: 10/626,206

Art Unit: 3714

(LRCF), which is a database formatted into blocks of data for each language and each block is comprised of a data record for each interface control in that language (Ambler: par. 37, lines 6-15).

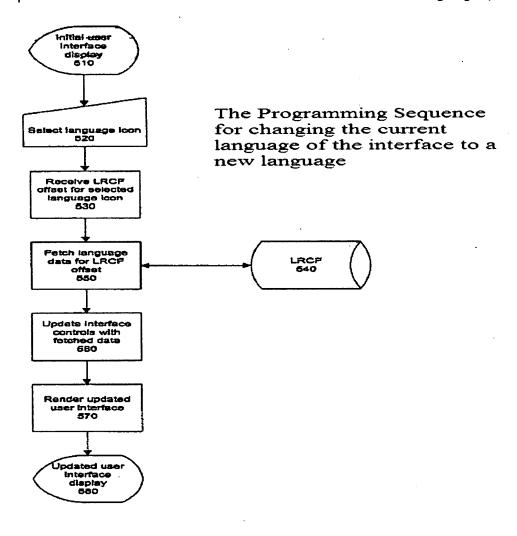

Figure 5

3. The location of Ambler's language selection window allows the user a full view of the screen or image, allowing the confirmation of the new language text by sacrificing precious work or screen space. Therefore Ambler fails to disclose displaying the selection window in the foreground partially covering the image of the program. Kruse discloses a user interface for a bowling alley (Kruse: Abstract). The interface allows a player to select the language for all screen displays (Kruse: col. 8, lines 12-13). The language selection window is displayed in the foreground partially covering the actual game image (Kruse: Fig. 7). It would have been obvious to one of ordinary skill

Application/Control Number: 10/626,206

Art Unit: 3714

in the art of user interfaces to combine the functionality of the system disclosed by Ambler with the design implementations of the interface used in the Kruse system. The art combination creates a gaming system that allows a user to dynamically switch between languages without losing their place in the game and sacrificing precious screen space by always displaying the language selection window.

Conclusion i

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christian E. Rendón whose telephone number is 571-272-3117. The examiner can normally be reached on 9 - 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert E. Pezzuto can be reached on 571-272-6996. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
